NEW YORK, May 2.-The Hall of Fame committee announced that several new selections have been received and conceded by the board of directors, making ninety-one new names to be considered "among the

names to be considered "among the justify famous."

Next fail the 102 electors of the Hall of Fame will select twenty, whose names are to occupy a place in the hall at New York University. There are 111 names of men and twenty-three names of women who have been hald from the last election in 1915.

This year there have been added eighty-seven names of men and four of women. Every name has been proposed by the public, and some received hundreds of public nominations. Only two public nominations where rejected this year by the commission of the Hall of Fame. These were Earbara Frietchie and Hawatha. They were rejected because the committee ruled that both were literary characters.

FOUNDED RHODE ISLAND?
Some of the nominations which have been made this year have caused much discussion almong the members of the committee. One is that of Dr. John Clarke, whose proposers declared that he was the real founder of the Rhode Island policy. The name of Roger Williams will be voted on again this year, and a tablet bearing the name of this contemporary of Clarke in Rhode Island is ready for unveiling.

Frederick Douglass, the first negro to be proposed, is among the new nominations. His nomination has caused much comment among those who believe that Booker T. Washington would be more representative of the colored Americans. Medical societies also are in controversy over their nominations.

Walt Whitman has many supporters. The actors have indersed the name of Edwin Hooth. Admirers of Walter Hunt, assert that he and not Elias Howe, whose name is in the hall, was the real inventor of the sewing machine; Ottmar Merganthaler, the inventor of the linotype, also has been nominated for a place among the immortals.

The names of womes have caused less discussion. The women have

FOR LADIES ONLY.

The names of womes have caused less discussion. The women have a separate Hall of Fame, but their names are proposed and accepted under the same rules.

Four women whose names goupon the preliminary ballot this year are Susan B. Anthony, Jame June Crely, Elizabeth Cady Stanton and Fannie Davenport.

FIGURES REVEAL RISE IN COST OF LIVING.

UREAU OF STATISTICS OF DE PARTMENT OF LABOR GIVES INCREASES.

WASHINGTON, May 2.- in a ta of figures made public today, the bureau of statistics of the Dethe bureau of statistics of the 'Pe-partment of Labor gives details of the increased cost of living for four-teen American cities since Decem-ber. 1914, up to December, 1919. SOUTHERN DEMOCRATS STRONG FOR HOOVER.

AUSTIN (Tex.) May 2.—W. Ward Smith of New York, manager of the Herbert Hoover campaign for President for the Southern States.

President for the Southern States, is in Texas for the purpose of organising Hoover clubs. He says that he has met with wonderful encouragement in the matter of receiving assurances of support of Hoover for President from Republicans and Democrats alike in this State. Mr. Smith came to Texas from Mississippi, where he has been working in the interest of Mr. Hoover.

He said that he had found an overwhelming sentiment in the South among Democrats for Hoover and a majority of them unqualifiedly say that if Hoover is nominated they will vote for him. In the event of Hoover's nomination, according to Mr. Smith, he will carry Virginia, West Virginia, Kentucky. Tennesses and North Carolina. He said his man also could count upen carrying five Congressional districts in the State of Georgia, four or five in Alabama and stood an excellent chance in Louisiana.

Her Husband Squandered Her Inheritance

SEVERAL years ago a father died intestate, leaving a considerable estate to his wife and children. A year later one of his youngest children, a daughter, became of age and received her share of the estate. At that time she was attending a school for girls. Upon her return home, after graduation, she renewed acquaintance with a man who knew her financial affairs through his previous association with the family in a business capacity. Within a week they were married.

On the morning after the marriage the daughter and her newly made husband appeared at the bank for securities and cash belonging to her. The property was the young woman's and subject to her own dis-

bank to do but deliver her property to her. Immediately the wife turned all of the cash and securities over to her husband. He has retained

control of them ever since, and most of the wife's inheritance has been dissi-pated in the husband's

PROLENIVE DISPATCE. TAMPICO (Mex.) May 2.—One of he best systems of highways in Mexico will extend from Tampico to

when the work that is now in progress and in contemplation is finished.

It is significant that the building of these modern roads is done by the larger oil corporations at their own expense. The particular object of their construction is to afford the different companies an opportunity to transport supplies to the fields at minimum cost.

One of the most important of these new highways is that which the Agwi Petroleum Company, subsidiary of the Atlantic Gulf and West Indies Steamship Company, is building. Nearly one-haif of the grading for this road is finished.

The road will run from Pueblo Viejo to Amatian and Tepetate, a distance of ninety-eight kilometers and, according to Mordelo Vincent, general manager for the company, will be the best road in this part of the country.

Instead of making a bee-line to connect the point of starting and the terminus the Agwi Petroleum Company highway will follow the old Indian trails along the higher ground and thus afford a wet weather road that will be serviceable all the year 'round.

covery in the first part of the past week. Prices having declined about 3 cents per pound below the high record of the season, a considerable short interest had accumulated, but the unfavorable weather in the south early this week drove shorts to cover and forced prices higher. October contracts selling up to 36.60, compared with 34.30, the low level reached on the reaction. After this activity the market moved within a narrow range during the rest of the week. Weather conditions were such that neither side was anxious to commit itself heavily, preferring to wait and see how the crop progresses during May.

According to some of the talent, many traders are waiting because they recognize that a wet May would turn the market completely over to the bulls, while dry weather in the east belt would probably allow much new planting. Good rains fell in North Texas during this week, but in Central and South Texas the rainfall was deficient and is badly needed. Owing to the drought much cotton land has not been planted and the crop, whatever its size, will be extremely late in Texas.

Spot markets continued to be dull. Liverpool business was small and eastern buyers were inactive, It is still very difficult to move the low grades, the slack business with Liverpool has affected exports unfavorably. Liverpool sales this week were 18,000 bales ompared with 31,000 bales which compared with \$4.55,000 bales which compared with \$4.55,000 bales for the season of last year. Houston spot prices were just the same as a week ago, middling being quoted at 41.25 cents. Gov. Hobby has called the Texas Legislature in special session for May 26 to enact laws to eradicate the pink bell worm in the affected county.

"Cotton traders here were considerably interested in the affected county.

The Literary Digest's" Mammoth Poll of 11,000,000 Citizens

THE LITERARY DIGEST is conducting the greatest poll ever taken, outside of a Presinital election, to learn whom the American people want for their Presidential candidates, and impresent indications this poll will register the voice of the people beyond question. Individually believe have been cost by mail to always million vectors throughout the United States. dual ballots have been sent by mail to eleven million voters throughout the United States — almost two-thirds of the total Presidential vote cast in the last Presidential election. Every ballot is mailed in an envelope, addressed with pen and ink, and delivered through the U. S. Postsonally to the voter addressed. Return postage on the ballot is prepaid, and the voter has only to check or write the name of his or her Party and the first and second choices for Presintial candidates, with no other mark of identification, and then drop this secret ballot in the et letter-box or Post-Office. Thus every vote cast is absolutely the free, uninfluenced, secret choice of the voter, unknown to anyone but the voter himself or herself.

The Tigers made a bid in the the which resulted in some comstion. Edington singled infield if was ferced by Smith, Mulligan Krug, Krug didn't throw to first an effort to make a double, siming that Edington interfered throwing up his arm. Krug's row was the only one required to apples the double. Umpire Lord reen allowed the claim, and called aith out for Stumpy's interference. umpy, Essiek and others protested a decision. Byron did all his examing with his arms. This not hy answered the protests, but ade it clear to the bugs why he lied Smith out. First. Byron bud raise his left arm up with his how close to his head, and then a right in the same manner. He dithe three or four times with the arm, and it looked like he was sting off his ears with his cloows. Spider Baum couldn't stand the rain in the morning same. South of the Bradshaw foothills, along the course of the Hassayampa River and below Rich Hill. the Octave, Yarnell. Planet and other noted mines, lies a great talus plain that has been crossed repeatedly by streams that have left gravel beds that are thousands of test in width in places. That these beds are rich in gold has been known for many years. It was for their washing by the hydraulic process that the ill-fated Walnut Grove dam was constructed on the Hassayampa for there has been renewed interest in the possibilities of the section and there is a prospect for the construction of a proper dam on the Hassayampa for the branks. About two-score holes now have been drilled from sixteen to sixty-five feet deep, about 100s test apart, to sample the gravel above bed rock to determine areas that might be profitable for steam of dredger work. The sands of the Hassayampa have been worked by placer miners since 1864 and profit still is being secured by a large number of workers when there is an abundance of water in the stream.

"I went to England to fight and when I came back I fought Tommy Ryan and Tommy West and became Ryan and Tommy West and became middleweight champion. I was pretty busy and didn't see a whole lot of Mrs. Selby No. 1. I like to fight men, but won't fight women. Then I heard that in Johannesburg. South Africa, they had hung up a purse of \$9000 for a fight. That was big, money in those days, so I started for South Africa. I sailed for England under the name of Charles Fitzgerald and then for Cape Town as Harry Egan. I had a lot of fun on that trip, in the athletic sports. I won first in every contest, boxing for a purse of £2 les, which was presented to me by Lady Grey. They thought I was so good they urged me to take up boxing as a profession. In Cape Town I cleaned up several promising boxers, still under the name of Egan. I was a skinny, coloriess kid then, and they laughed at me and bet against me. It was a picnic. They matched me to fight Daugherty. Australian champion, but I got the fever and they thought I was going to die, and then the one man there who knew who I was gave it away. Says Ballot for Johnson is

Wasted Opportunity.

Supporters of Gen. Wood and Gov. Lowden are expected to aid materially in piling up a huge Hoover vote in California, according to Edward D. Lyman, head of the Hoover Republican Club in Southern California, who yesterday issued a final call to all Republicans to east their ballots for the former Food Administrator at the primary tomorrow. He pointed out that by staying away from the poils the supporters of Wood and Lowden would not only be wasting their ballots but would actually be alding Johnson.

"It is imperative that we get out "Benator Johnson's bitter" "Benator Johnson's bitter"

would not only be wasting their beliots but would actually be aiding Johnson.

"It is imperative that we get out the biggest possible vote for Hoover. The one thing that will defeat Hoover will be apathy—failure of Californians to realize that this fight is between the forces of decency and constructive ideals against radicalism and machine politics.

"Supporters of Gen. Wood and Gov. Lowden can aid tremendously in this victory by remembering that neither one of these candidates is entered in the California primary, and the way therefore is open to casting their votes for Herbert Hoover. If they fall to do this they will be losing the chance to make the vote positive for Hoover. To stay away from the polling places of course, will mean that their votes will be wasted, and the advantage given Johnson.

"It, should be remembered that few persons well informed politically, even among the Johnson forces will be wasted, and the advantage given Johnson.

"It, should be remembered that few persons well informed politically, even among the Johnson forces will be wasted, and the saturants radicalism and his fight on the cleague of Nations will prevent this. Why, then, should California makes him its choice at this primary? On the other hand, Hoover is unmiscated in the country prove this conclusively. If California honors him tomorrow I am convinced that it will mean his nomination in June and election in November.

That was big, money in those days, so I started for South Africa. I sailed for England under the name of Charles Fitigseraid and then for Cape Town as Harry Egan. I had a lot of fun on that trip, in the athletic sports. I won first in every contest, boxing for a purse of £2 los, which was presented to me by Lady Grey. They thought I was so good they urged me to take up boxing as a profession. In Cape Town I cleaned up several promising boxers, still under the name of Egan. Q.: How did the American colonists come to adopt the "Rattlemake Fing?"

A.: This fing is said to have originated from the humorous suggestion made by a writer in Franklin's paper, the Pennsylvania Gasetts, that in return for wrongs which England forced on the colonists, a cargo of rattlemakes be sent across and distributed in St. James Park and other places of pleasure. Col. Gadsden of the marine committee presented to the Continental Congress, Feb. 8, 1776, "an elegant standard, such as to be used by the commander-in-chief of the American navy being a yellow fing with a representation of a rattlesnake colled for attack."

MPLE BAPTIST CHURCH. "Is it not true that in our modern age men and women have more regard for money than they have for manhood? There are many lines of business where the greed for gain simply crushes the health and life out of the workers in orler to gain an extra 5 or 10 per cent

for the employer.

"When we think of the amount of money spent in reclaiming waste lands and in the turning of deserts into veritable paradises we have every reason to be thankful for man's reason and ingenuity; but how little, in comparison, is spent in reclaiming the deserts of humanity scattered all over this world. Men are willing to put money into tidelands that can be exchanged in a few years for several thousand-fold increase—but how many men are there who are willing to put money into fallen humanity, that it may be transformed into pure and beautiful character? The church must be willing to do this if it would carry out the mission of Jesua. "Jesus Christ believed that all men were worth savins. He made no distinction as to race, color or condition. It is for the church of Christ to show its appreciation of man's value by being willing to sacrifice time, talent, powers and money for the salvation of the world."

"Some practical soul may come along and ask why we bother about what lies beyond the sunset. Why set up an interrogation point at either end of the grave? Why? Because, if you simply roll a great stone to the grave of Jesus and leave it there, you will eliminate much of the art and poetry and music and philesophy of the world. Man's dreams and hopes and fears will not be walled up. Let us begin on the very lowest ground—the nature of man—and even here you find your answer. Deep down in the subconscious mind (or soul) are buried continents of longing and desire and out of this great deep there rises like a mountain tog, appearing as an island, the passion for endless life.

"My belief in immortality, however, is not only based upon the instincts of man, but upon the character of God. Because the ancient Hebrews taught us that God is good and true and just, I know my future and yours is secure in His hands. I know He will not let man's instinct play him false. And I further base my belief in immortality upon the experience of Christ—to the Christian the ultimate reason. The first two are inferences, guesses, but here is the solid ground of fact. The question mark has changed to an exclamation point, the dires of doabt to an anthem of joy: 'I know that my Redeemer liveth,' and because He lives I shall live also."

"Christ did not secure present ease at the expense of duty. When His work demanded that He trudge over dusty roads He did it. When it was necessary for Him to become the man of sorrows He became such. When He trod the wine press alone He did it without murmuring. When He saw that foxes had holes and the birds of the air had nests, and that He did not have place to lay His flead, He faltered not. When He tred of the road He staggered not, but in the freedom, majesty, sovereignty and glory of His purpose He marched on to the fulfillment of the plan of God. And he who puts on Christ must not falter when the hour of testing comes, Falschood may seem to be the carists way out of a diffeculty sometimes. Some one has said that a lie is an abomination to the Lord, but a very present help in time of trouble, but a lie jams a man in a corner whence there is no escape. It is obedience to the higher voices that must bring in the music of the march of life. It is faltifulness to the plan and purpose of God that gives the beatlinde of life."

DR. GEORGE A. ANDREWS.
PLYMOUTH CONGREGATIONAL.

"We have a false and very pessimistic view of contagion. We are afraid of it, instead of being thankful for it. We act as though only disease and vice were contagious, apparently forgetting that health and virtue are more contagious, Contagion is due only to the presence of life. Nature is so full of the life principle that living things of a low order are generated even in unwholesome conditions, and these fiving germs are constantly reaching out to feed on other forms of life. Most of these germs now of life. Most of these and nations and groups have much more that may be hopeful to each other than harmful. The apostles of this attitude are in the political ways of the elements that races and nations have in common, empathies, proposing to carefully seek out the elements that races and nations have in common, empathies, proposing to correlating fabric of them to build up slowly but surely a common co-ordinating fabric of the reason and good-will shall in which reason and good-will shall embrace them all in which reason and good-will shall be common co-ordinating fabric of the vorid and are appeared upon the face of the world and are appeared upon the face of the earth; has brought modes of the earth; has b

been wiped out of existence long ago.

"So the ferments of the bodily appetites, and selfish desirus prey upon our souls and sometimes are productive of vice. But is most cases these germs, too, are thrown off by the higher and more powerful spiritual life processes of obedience to duty and love. Virtue is more contagious than yive. Geodness is working to make it worse. "The leaven of life in God's, world 's working slowly but surely towards the accomplishment of God's kingdom. It will work and must work 'until all is leavened."

"The mother is the human 'Inspiration Point' of life. It is true of all races, nations and conditions of men. Nowhere in all the world or in all the agea has humanity made moral progress beyond the point reached by the mothers of that race or nation or time. As the Spartan mother was the highest source of inspiring valor to those people, so is the Christian mother our noblest, and safest conservator of the highest moral attainments of the race. Notwithstanding Ahaziah was 42 years of are when he ascended the throne of Judah he was as much and accurately an example of his mother's teaching and inspiration as if he had only been 5. What significant words! 'Wherefore he did wil in the sight-of the Lord like the house of Ahab: for his mother was his counsellor to do wickedly." The King's mother was accorded special honor in the Hebrew system. No better confirmation of the truth that the mother is the most outsanding influence for good or evil can be found than that of the treord of the lives and acts of the kings of Israel and Judah. It is no accident, neither is the record made by chance that the good kings.

had good mothers and the bad kings had bad mothers. Given, thoroughly consecrated Christian mothers and the remainder of the task of making the world safe for averybody and everything will follow as a matter of course. Not only may great men with truth affirm that they owe all to Christian mothers, but nations can say truly they cannot succeed without the inspiring influence of good mothers. Let us sacredly guard and constantly appreciate the dearest of possessions, a saintly mother. 'A mother is, a mother still, the holiest thing alive,'"

DR. W. E. TILROE. LAKE AVENUE METHODIST. "An old deacon would not have a lightning rod on his church, Said if the Lord wanted to thunder His a lightning rod on his church. Said if the Lord wanted to thunder His own house down He might thunder. Not a few good people think the Lord has a guarantee on churches. The truth is a church will die as a lodge or a club or a political party will die. Piety will not save it if indeed piety can save itself without brains. A sanctified stupidity is rare. If a church will reach the top it must climb like folks.

"It must have large rooms for individualism. The personal worker is the right hand of a church. Probably the preacher does less with his sermon than with what he is. The more work a church can find for its members the more of a church it will be.

"It is no contradiction that it must also have team work. That men work together as never since time began is the glory of the age. An arrival of the prehistoric period, used as a beast of burden would sometimes balk. He never got anywhere. Not at balking. He did get a hiding. He was also sold by and by. And every master was worse.

Being a priori speculations, they can of course, claim a general application, irrespective of discoveries, but they could hardly have originated in a world as large, as law-governed, and as concrete as ours. "The religion which can meet the altered conditions must-be primarily one of principles, without respect of persons or localities or periods or any other distinctions and limitations which amount to discrimination, favoritism, or fickleness in the governing power. Nothing but essence, quality, is perpanent. All forms are transient, all rules subject to modification. These have their use, and conservatism is justified in holding fast as long as possible. But as the old order changes, giving place to new, in the relentless march of evolution, only the undying principle can survive; the code and creed and constitution, as imperfect expressions, must yield to amendment or pass into limbo. What the thoughtful world is groping for today is a religion which accords with the new knowledge, not the obsolete text-books of the past."

Herbert Hoover says that it is not snough to merely denounce profiteering. The specific steps by which advancing prices are to be checked must be shown; methods of better distribution through inselligent organisation must be indicated; margins and risks must be considered and transportation improved. He has neither the time nor the opportunity to go further in detail, but we surely would rather trust the matter of reducing the cost of living to him than to Atty-Gen. Palmer or the Congressional investigating committees. If sional investigating committees. If ver had been in full command he would accomplished something first and ad about it afterward. That is the I Hoover way.

CHES OF THE AIR. Cities are not passing ordinances reg-ing the speed of airships, but they are g the height at which they may pass. city of Newark, for instance, places a lity upon an aeronaut who flutters over Jersey jewel at a height of less than feet. If a fiyer drops down to 2500 tool feet. If a fiyer drops down to 2500 feet or so an aerial cop is likely to take up the chase and pinch him between clouds. The government regulations for the flying mail service require the pilots to pass over cities at a height of at least 3000 feet. A shorter distance seems to spell danger should the aviator be suddenly compelled to seek a landing. He is liable to bowl over a lot of people in a busy street. The higher up an aviator is the better and the easier it is for him to reach a safe and proper landing in case of an emergency. As a center of aviation Los Angeles might not a pattern in the way of reasonable and acceptable regulation of serial traffic. Let the flyers themselves determine what is safe and same for both aviators and public.

A SMILING WORLD.

A Premier Nitti of Italy is anxious to have relations with Russia reatored. He says that if people of other countries get in and see what a coviet government has done and is doing to a country that should be one of the richest in the world there would be no more danger of the spread of Belshevism. If the rest of Europe helped Ruscia would go to work and in time redeem herself. The Italian Premier says that the war is over and that men must think in terms of peace rather than war if they would save any further outbreak. With characteristic Latin tempo Signor Nitti adds: "Let us forget about war and write poetry and sing sweet music. The trouble with the world today is that it has forgotten how to smile. When two men stand always face to face, each believing that the other has murder in his heart, they end by fighting. If they go on about their business and when they do meet one chances to smile, the other will respond in kind. We need smiles in the world today." Nitti is not nutty. His suggestion about poetry and song is not bad—for the Italians. An army of poeta, equipped with fountain pena, would be a pleasant relief from the hattalions of armed warriors fiying at each other's threats. If Nitti would trap his fawarne bard, D'Amnunalo, and make him substitute the quili for the sword it would help some to start with. The world may not substitute the quill for the sword it would help some to start with. The world may not exactly be suffering for poetry and song— we still have Amy Lowell and "Dardanel-"—but the smile habit would shine up the orid a whole lot. Let Nitti put it into the rest covenant somewhere and everybody ould be in favor of it—that is, everybody

A BARBED-WIRE ENTANGLEMENT. marchers would have to juggle their feet wonderfully to keep step. There would

be a strange and incongruous mass ranging from the millionaires of California to the unkempt Reds of Hoboken. Plutograts and the I.W.'s would go wobbling down the same road to the discordant strains of "He Ric Ma Piret". "He Bit Me First."

Hiram himself should lead the band. No

one but he can get so much volume out of the brasses. He can get the wildest burst of discord from some inoffensive tinkle of harmony—a regular paroxysm of sound that would break up anything from a fu-neral to a bull fight. It would be just such neral to a bull fight. It would be just such music as would fit a Johnson parade. Here would be the portly German with his massive tuba blowing out the crescendo of "Die Wacht am Rhein" and the wiry Sinn Feiner with his one-string basoo trying out 'Ireland Was Ireland When England Was a Pup." The Reds would come in strong with the "Bomb! Bomb!" of the bass drum. Possibly William Randolph Hearst could be brought into it, but it is hard to march with an organ and he would want to make with an organ and he would want to make his discords from the side lines. Maybe his discords from the side lines. Maybe be could learn the piccole and go with the rest. There would have to be the parior Bolshevist with his harp of a thousand strings, and the Nonpartisan Leaguer with his snares and cymbals. Every new and then the matchless leader would give a solo on the megaphone, on which he is a finished—or almost finished—performer. In the overlating department, there would here the orchestra department there would be Bill Crocker and Mike de Young with their second fiddles and Frank Flint with his busted harmonica.

Whether viewed as a parade, an orchestri whether viewed as a parade, an orchestra or a theatrical performance, the Johnson outfit indicates the most bizarre combina-tions of which the human mind and will are capable. And yet, outside of the chorus of California millionaires, there is a sort of an understanding and working agreement among them. They are all "agin th sovernment." The anti-England antipeac treaty section may not be as plain-spoke as the Reds, the radicals, the Socialists as the Reds, the radicals, the Socialists, the Nonpartisan Leaguers, the Germans and other stormy petrels, but they are unconsciously working to the same end. The stalwart and substantial California Republicans are the hardest to understand. One would think they really ought to blush at the company they are keeping. Only a few months back Hiram was declaring that Mike de Young and William H. Crocker were not fit for a white man to associate with and no political party was big enough to hold him and them. The Republican party was dead and rotten, anyhow, and they could go to Hades with it—just like that. Oh! but Hiram was a plain, blunt man in calling calamity down upon the man in calling calamity down upon the Crockers, the De Youngs, the Pilnts and the Old Guard. And what did Mike de Young say about Johnson? Nothing much except that he was a political crook and blackleg, an ingrate, a noisy demagogue or some trifle like that.

And now Mike is holding Hiram's hat and coat while he shaves. They are not only under the same roof, but in the same body. It takes a crany quit to cover them and it is easy to imagine that both are holding their noons.

It was Hiram that "put the Southern Pa-cific out of politics" and slapped the eye of William Henry Crocker with his inherited millions. Now the Southern Pacific inter-ests all seem to be allied with the Johnson ests all seem to be allied with the Johnson cause, and Crocker is one of Hiram's favorite doormats. A few of the supposedly safe and sane Republican leaders of California are trying to keep step with the Hearst-Johnson anti-English, antipeace combination, with its plans for government ownership of railroads and revolution. They are using their names and their organization to assist in the launching of a Third Party. Third Party.

And such a party!

A VITUPERATIVE CANDIDATE.

It is an axiom of the marshes that the struck bird always fitters. Perhaps the thousands of sincere men and women of California who are earnestly engaged in their campaign to elect as President Herbert Hoover, the great Food Administrator, will be interested to know what Senator Johnson to saving about them in the Feat VITUPERATIVE CANDIDATE. Johnson is saying about them in the East. The following extract is taken from a dispatch wired to the Washington Post on April 24 by its Philadelphia correspondent

april 24 by its Philadelphia correspondent. "I have just received wires from California," said Senator Jobneon, as he lit a cigar and placed his derby atop his head at a jaunty angle, "that the good Mr. Hoover is conducting in that State the filthiest, nastiest, most disreputable campaign ever waged there. "Hoover has behind him every crooked and disreputable force and enormous sums of money. He is stopping at nothing that is disreputable, indecent and dishonest."

Mrs. Johnson laughed and whispered to one of the Senator's political aides, "'Hi' is certainly handing it to Hoover." to one of the Senator's political aides,
"'Hi' is certainly handing it to Hoover."
Vituperation and abuse are weapons that
Senator Johnson handles with great case.
He uses them in the present instance in
default of argument. Most of these men
and women at one time voted for Senator
Johnson. They put him where he is today;
and this is their reward when they dare
support another than he for President. Herbert Hoover has made no campaign at all
in California, as Senator Johnson well
knows. But there are many thousand men
and women in the State who are actuated
by a sincere desire to see Herbert Hoover
elected President. They are not necessarily campaigning against Johnson, for they
know that he could not possibly win the
Republican nomination, even though he carried California; and they know that a
Hoover victory here would set Hoover well
Some one has said that "Whom the gods
would destroy, they first make mad." Judging from the intemperate language Senator
Johnson is using against those who were
once his stanch supporters he is already a

highest position any country has to offer. On Tuesday every California voter will be called upon to decide between them. Herbert Hoover has a State, national and international reputation for the most stupendously efficient achievement of service during the war—in almost the only department of service unsullied by reproach, obvious in its universal benefits, amazing in its complete efficacy. Hiram Johnson has State reputation as a vaunting politician entry into "the war to end war," as set forth by our President at the Peace Conference, as implied in our hospitality for all nations, as so far applied in our world

Herbert Hoover makes no personal work of reconstruction, remains at his post for themselves and is obviously devoid of personal ambition. Hiram Johnson claims everything, tours the country for his own recommendation, belittles his opponents, caters to hatred, prejudice and fear and seeks to provincialize America, to propa-gate a Sinn Fein ("ourselves alone") doctrine in this country of selfishness, insularity and national snobbishness.

There are a few plaintive voices, like that of the Fresno Republican, asking the California electorate to ignore Senator hason's bitter opposition to any League of Nations in any form and to vote for him ecause he was once a good fellow-to be merciful. But the future of the nation is much more vital to Californians than that of Senator Johnson. On Tuesday the State must decide whether it is to go forward with Hoover or backward with Johns

Senator Johnson has not given evidence of any change of heart. Wherever he has spoken he has declared that he is against any League, under any conditions. He says the issue is League or no League. Times is not prepared to believe that the electorate of California is so reactionary that it will vote to send to Washington a President who has announced in advance his policy of complete isolation; who would array this country in open hostility against our late allies.

Why not keep an account of your income and expenses? To know where every dollar comes from and where it goes is a real ncentive to earn more and to waste less; t is a real aid to sensible thrift, which should be our aim in these unusual times, for that is one way to bring down the high prices, and every dollar saved will be worth two in a few years. to Los Angeles have engaged the attention of the Senate. That body restored to the navy bill an appropriation deleted by the House of Representatives for a submarine base at the harbor. Thanks must be and are hereby extended to a Democrat, Senator Phelan, for his activity on behalf of this city. Representative Osborne worked to the utmost to prevent the House making the mistake of removing the item on the ground of economy. One can only be amazed at the shortsightedness of the Representatives who sought to prevent the establishment of a diver base here. They are aware of the great importance of sub-marines; they know that if danger is com-ing to the United States it is, in the words of Senator Lodge, coming on the Pacific, and they have been informed by naval au-thorities that the finest site on this coast for a submarine station is the one offered by Los Angeles. Yet they voted against it! The Senate had to bring them to their senses. The second thing of great interest here just discussed by the latter body is the oil supply. Now that Los Angeles Harbor is practically the headqu will hereafter always be a number of Unitthing must be done to insure the vessels an adequate supply of oil for fuel. The debate on the subject in the Senate was barren of results. Senators Jones and Phelan suggested an export embargo on Amer ican oil, but doubt was thrown on the con-stitutionality of such action. Pity the poor Turk, harried by the have and desolation of war! It is said that there are hardly seven hundred firstsultanate of Turkey. Pashas that had forty or fifty high-toned dames on their matri-monial staffs now have a beggarly three or four. When a large-hearted and amiable polygamist, who has been in the habit of caressing a flock of a hundred or more brunette fairies, is reduced to a pairry half-dozen it does seem pitiful. It is said that one able-bodied Turk, once the wealthy Governor of a province with a harem con taining fifty-seven varieties of beauties, is now down to his last wife and does not know where the next is coming from. A man with one measly wife can hardly be considered an effendi, but that is what a lot of the Turks are coming to. EXPEDIENCY BEHIND JOHNSON'S SUPPORT?

ODD POLITICAL ALIGNMENTS IN STATE DISCUSSED BY CAPT. FREDERICKS.

The following signed statement of yesterday by Capt. John D. Freder

The strange political alixaments which seem at first so complex in the Republican primary situation need not concern us particularly.

If we eliminate those who are

other for principle.

Making the elimination just referred to, the so-called "standpat" Republicans, who are supporting Johnson, are doing so confessedly because of expediency. Johnson has won so often in California that Flint, Crocker, de Young, et al, felt he would win again, forgetting khat the elements which in the past have contributed to his success have now entirely deserted him. The same elecontributed to his success have now entirely deserted him. The same ele-ment in the old Progressive party are supporting Johnson—men like Lisaner, who are simply political ex-pedients.

dissner, who are simply political expedients.

I do not believe a party can be maintained with the element of political expediency predominating. If it can, it isn't worth while. When the loaves and fishes play out, such a party blows up.

Johnson has always been saturated with this political tendency. He has seized and ridden a popular idea. That he had no fixed affection for the steed he rode, is shown by his present alignment. This alignment also shows that his previous criticisms of his present bedfellows were mere bunk, to induce the clapping of hands and the throwing up of swenty night caps.

On the other hand, those men and women who followed the progressive ideal, because of principle—such men as Teague, Dixon of the Express, and such women as Mrs. Gibson, and hundreds of others whose names will at once suggest themselves—find no difficulty in joining hands with former "standpatters" like W. M. Garland, F. C. Fairbanks, C. C. Chapman, Harry Chandler, P. V. Beveridge, Judge Ballard, Judge Bordwell, Mr. Variel, Phil Stanton and many others who believed what they advocated always, because of principle. And this combination is the real hope of the Republican party in this State and is back of Hoover because of a principle.

Republican party in this state and is back of Hoover because of a principle.

That principle is found in the imperative need of the nation at this hour for a real constructive genius in control, one familiar with the intricate details of the business, commercial and industrial world, 'to whose great mind and heart the laboring man and the employer, the creator and the consumer, can appeal with the assurance of understanding and sympathy.

The problems which are now confronting us are problems with which Johnson has had no training or experience. On the other hand, they are problems with which Hoover has grappled all his life. What America needs now is an engineer. We need the quiet, calm, deep study and action of a man whose training and experience has fitted him for working out economical problems, a man who will speak his mind, declare his principles and be steadfast and consistent.

Organization of a new lodge of the therhood of Railway Trainmen No. 848, probably to be called the 'Phoenix" lodge in consequence of the recent strike trouble, was anounced by R. A. Edwards, deputy resident of the B.R.T., yesterday pening the charter at 2 p.m. Satur day, 200 members of lodges Nos. 808 and 74, whose charters had been revoked for participation in the illegal strike, were taken into the new rned to work and were not implimembership. Those who refused to work and live up to the laws of the brotherhood by refusing to protect the contracts with the several rail-ways will not be allowed to re-enter, Mr. Edwards declared. The charter was closed at mid-night, by which time Mr. Edwards estimated there were \$00 men en-

rolled.

According to information given out by Mr. Edwards, forty charters have been revoked in the entire country involving about 18,000 men. About twenty new lodges have been organized, enabling fully 10,000 men to be received back into the brother-heed.

Prosecutions of violations of the Volstead law, relating to the sale and transportation of intoxicating liquors, threaten to engulf the local federal court.

Federal court.

There are now a goore or more such cases pending in the departments of U. B. District Judges Trippet and Biedsoe and when the May calendar trial dates are set today there will be another score to look after. Meanwhile the daily work before U. B. Commissioner Long is made up of preliminary examinations growing out of the claimed violation of the prohibition law. This is constantly adding to the mass of litigaton growing out of Congressional action.

class by giving a friend a drink of an alcoholic content in excess of one-half of 1 per cent.

U. S. District Judge Bledsoe has gone on record as favoring less punishment for the man who buys a small quantity of the hot and rehelious stuff than the man who sells it at an outraseous price, and not only violates the law but lifts himself into the ranks of the profiteers by collecting outrageous prices.

There is a strong feeling in official circles that the Federal courts should not be cluttered up with such minor matters, and efforts have been made to secure legislation by Congress giving the U. S. Commissioner jurisdiction in such cases, but nothing has come of it. The present arrangement is an expensive one for the government, for witnesses before the Commissioner, the grand jury and the court at the final trial, get three daily fees; \$1.50 a day for attendance upon the Commissioner's hearing and \$3 a day each for the grand jury and the court.

AUTO TRANSACTIONS

George Gordon, alias Dan Mur-phy, was lodged in the County Jail Saturday by Deputy Sheriffs Wright and Strong on charges that he has defrauded various persons by buying automobiles on lease contracts and selling at reduced prices. Preston Gordon, a younger brother of the man arrested, and Frank Fisher were also taken into custody, but were released.

******** "Bluebeard" Watson yet has at least nine missing women to account for was the statement made last night by Supt. Armstrong of the Nick Harris Detective Agency, who has been collaborating with the Sheriff's office in gathering evidence against the asserted multibigamist.
Supt. Armstrong declared Watson
has only told one-third of what the
police authorities know of his carear f crime and has only told one-undredth of what he can tell to

This working sheet, a valuable asset to the investigators, absolutely
proves the following facts it is
declared:
That Watson, accompanied by
Mrs. Deloney, left Santa Monica at
11 a.m. January 26, telling Mrs. M.
Green, his landlady, that he and Mrs.
Deloney were going into Mexican
territory and thence through the
Grand Canyon to various points in
Arisona, and then back to San Franelsoci

Grand Canyon to various points in Arisona, and then back to San Francisco;
That at 2:46 p.m., January 27, he arrived at the Land Hotel in Sacramento, alone; that he was there two days;
That on January 36, he sent a letter to Mra. Wombacher from Bakersfield.
These facts suggest strongly, it is asserted, that Watson did not take the body of Mrs. Deloney to Imperial Valley, for if such was the case, he ceuld not have reached Sacramento by the afternoon of January 27 or 25 after burying the body at dusk of the 37th. Hence, the search for the missing body of Mrs. Deloney tends to shift northward—probably in the vicinity of Bakersfield.
By checking on the time of his departure from Santa Monica it could have been possible for Watson to Motor to Bakersfield with Mrs. Deloney on January 26, then to have caught the Owl limited at 11:26 p.m. for Sacramento. Though he left Santa Monica with Mrs. Deloney, he arrived in Sacramento alone. He could have murdered Mrs. Deloney in this county, buried her at some point between here and Bakersfield, caught the Owl limited for Sacramento, and then could have returned to the Bakersfield vicinity to recover his car.

STATE JUSTICE LAUDS HOOVER.

Curtis D. Wilbur Urges Need of Going to Polls.

Warns Against Opponents of League of Nations.

Pictures Germany Trying to Win at Polls Here.

Declaring that the forthcoming the most mementous events in the history of the world, and that conservative, men who realize the great problems which lie ahead must go to the polls and cast their votes for the welfare of their country and the good of humanity, Curtis D. Wilbur, associate justice of the State Supreme Court, delivered a forceful address yesterday morning before the members of the Baraca Class of the First Congregational Church, more than forty of whom saw service in the world war.

Asserting that the direct primary law of this State has had a tendency to disintegrate parties, the associate justice proved his point by calling attention to the fact that while a Republican Senator was elected, a Republican candidate for the Presidency was defeated a short while ago. He touched upon the necessity for a League of Nations, and strongly defended Herbert Hoover's position regarding the League, at the same time warning his auditors that a vote for anyone opposed to such a league is a backward step for civilization. Among other things, he said:

"If you boys who went over there forget that the struggle is still on, that the victory is yet to be achieved, that the progress of humanity must still be toward the right and that what you do is of consequence today as it was then; if you forget these things, you have fallen short of your opportunity.

"You may regard the political struggles this spring and this fall in which America chooses a Presiden-tial candidate and a President, in which she chooses her Congress and tial candidate and a President, in which she chooses her Congress and some of her Senators, as a continuance of the unending fight between good and evil. That in this struggle you shall be mindful of the fact that the forces of evil are not dead, though they may seem disfigured, and that there will be a struggle at the American polling places by the very people we have fought on the other side. If you made great sacrifices then you should be eager to make the smaller sacrifices now demanded.

terly passed away, legally speaking, January 17, the May festival on the campus of the Southern Branch of the University of California Friday will be a beautiful reminder that Bacchus like Pan, is not dead—or, at least, that his spirit survives, even if his spirits do not. Being educational in its frolics as well as in its serious endeavors, the university, in its annual Dionysia, puts over the lesson that Dionysia, puts over the lesson that Dionysia, puts over the lesson that Dionysia (Bacchus) was not merely the god of fermented grape juice, as most of us imagine, but to the Greeks represented a poetic incarnation of blythe, change able, spirited youth. In Greece the Greater Dionysia was celebrated with pageants, dancing and flowers.

Miss Norma Gould will direct the Dionysia here next Friday, and it promises to be as joyous and lovely a frolic as ever was held in Greece or even on high Olympus. Esthetic and symbolic dances will have a large part in it and it will somewhat foliow the lines of the ancient Greek drama. Apollo, Aurors and many other well known citisens will be present and take part, and a Bacchanal ensemble in celebration of the joy of life will bring the festival to a closs. But absolutely nothing fermented will be on tap.

The festival will begin at 3:20 p.m. The music department of the school and the orchestra have arranged the musical accompaniment.

"We are in sympathy with any movement that will help reduce the high cost of living and are at all times ready and anxious to help along a good cause. We profit by this movement, as the publicity and advertising given our production by all the newspapers of the country could not be bought for hundreds of thousands of dollars. But—
"In justice to the man who wears overalls, not from choice, but from actual necessity, we cannot conscientiously keep silent and profit from a movement which will have only one result, and that is that the man who must wear overalls will be forced to pay more for them. The immutable law of supply and demand is still in effect. Manufacturers of overalls have no control over this. Blue denim for the past two years or so has been the scarcest cloth on the market. Strange as this may seem it is practically impossible to buy denims to day from the denim mills at any price. Overall manufacturers who make good serviceable garments are months behind on their orders. "Every pair of overalls bought by a man who will use them only while this fad is on, simply leaves one pair less for the man who has to wear them. This fad will not reduce the cost of clothing. It will merely increase the cost of overalls."

loney today again sought it in the hills in Devil's Basin, at the foot of the Cerro Pintos, and the rugged, rock-covered mountains again refused to disclose the sandy sepulchre of Nina Lee Deloney, the woman "Bluebeard Watson" said he killed and took there to bury.

Sheriff Charles M. Applestill took personal charge of the searching party today and with the assistance of Deputy Sheriff Sam T. Griffin of Imperial county, deputies and newspapermen from Los Angeles, and asmall group of volunteer workers, started up the rocky slopes in search of the hidden grave. Every side canyon was covered and every suspicious looking spot probed with the picks and shovels.

But after a futile search a long distance call was placed for Los Angeles and the situation explained there.

"Watson personally will have to be brought here, taken to the mountainside, and carried on a stretcher to the very spot, if necessary, before we can find this grave, if it is here," was Sheriff Applestill's remarks after he had climbed up and down most of the hills and guiches.

Deputies Couts and Bell left for Los Angeles via San Diego tonight, saying Watson is coming Friday, and Sheriff Applestill is to make arrangements here for him. Chief Dep. Dist.-Aity. Doran. Detective James Smith of the District Attorney's office arrived here this afternoon. Doran while here will look into possible wives in the Imperial Valley.

EGGINITT

Egg Substance Not Egg Substitute

THANKS to this new egg product—thousands of house-wives will soon say, "Farewell, a long farewell to egg-less recipes—with which we've tried to span the High Cost of Living."

Egg-In-ITT comes as a helpful aide to your home-to every home where good things to eat are appreciated, where food-values are considered, where cost is reckoned but not regarded as the vital consequence.

Egg-In-ITT is actually eggs, real eggs, in a more convenient, more readily usable form. It is not an egg-substitute, to be mixed or handled in some mysterious way. It is exactly what its name implies. It is the real thing.

You use EGG-IN-ITT in any recipe that calls for eggs and baking powder. And you get better results than you did in the old way, by tedious whipping of eggs and beating of batter. For, the baking powder is so perfectly distributed throughout the finely powdered egg that, when flour, sugar, etc., are added, the mixture needs only the addition of moisture and a little stirring.

In a hundred ways, Egg-In-ITT proves itself a treasure of convenience, palatability and economy. Get a trial can today-at your grocer's-and see for yourself what Egg-In-

Eleven Samples. LOS ANGELES, April 18.—Q. in to be found. What is your opinion?

A.: Probably the best way to report on the samples is to give you results of chemical tests made thereon. The fiame of the blowoppe gives a strontium-red color. The mineral carries lime carbonate and strontium is present. It "fixes" violently in acids; soheelite never gives such a reaction, and the solution yields no yellowish tungstic acid (tungsten trioxide.) There is a big per cent. of nicroscopical muscovite (potash mica) in the ore, with quarts and aluminum silicate.

Two Weeks From Today

The motor truck interests of Los Angeles and all other progressive communities will celebrate Ship by Truck-Good Roads Week.

Trains of motor trucks will start out from hundreds of cities into the surrounding territories carrying a live message to farmers and merchants en route:

That the motor truck—first proven at the Battle of the Marne and developed through four years of war-has broken the transportation tie-up in America and is carrving the short-haul tonnage of the nation.

Ship by Truck is clearing away congestion at railway terminals; it is releasing our railroads for the development of profitable long-haul facilities. Ship by Truck is extending the trading radius of every town and city. It is bringing farm products direct to the market quickly and economically.

Where the traffic is developed, there the highway is needed. Ship by Truck demonstrates the commercial value of Good Roads -a clinching argument.

During the week of May 17th to 22nd thousands of Ship by Truck - Good Roads demonstrations from Maine to California will arouse the public consciousness to the need of better distribution and quicker transportation.

Leaders in the Nation's business, in the financial world and in government circles, endorse the Ship by Truck movement and this great demonstration. of its efficiency.

The commercial interests of Los Angeles are backing the Los Angeles tours. It is a great co-operative movement that every citizen has an interest in.

To truck owners, operators and everyone concerned with better shorthaul transportation:

Get in touch with headquarters. Find out what you can do to help make Los Angeles demonstration week a thorough success.

TRIANGLE PICTURE

ting us miff the vintage of yester-year down at the Alhambra The-ater this week. It is ingeniously called "You Can't Believe Every-thing," and though we're not in the habit of being quite that credulous, we do admit that the film's title is apt for the billing of Gloria Swanson as "Cecil de Mille's famous star." This picture was made when the lady of effulgent charm was with the Triangle, be-fore her ability as a serious actress had been lustriously developed by the Famous Players-Lasky director-general.

Aside from the fact that styles
in clothes, automobiles and pictures
rapidly faccumulate cobwebs, there is
an element of professional interest
in eeeing how a certain featured
player used to act. In the instance
of Miss Swanson it is worthy of note
that she spent quite as much time in
dazzling bathing costumes a few
years ago on the screen as she does
now, although not amid such resplendent surroundings as in "Why
Change Your Wife?" Miss Swanson
foes do a considerable amount of
swimming in the Triangle picture,
mainly to avoid the obnoxious attentions of various admirers.

The plot of the film is episodic
and the situations draggy. The
main part of the story savors of the

be arguments among spectators
that she should have accepted the

How much longer, I wonder, will
Miss Talmadge continue to hold her

Lew Cody is impressing on fandom a new type of being, a rather axolic type, to be sure, rather Latin than Anglo-Saxon in emphasis of the period.

Brought down to date the theme rould make a good comedy with the priore-making, "You Can't Believe werything" is a sample for contrast ith today. A Universal film with fallets, hammers, and all the other rols of the conventional slapstick on the bill.
